

Respiratory System

Name Age Sex Occupation Address

Chief complaints

H/O Presenting complaints

Cough

Duration
Onset
Paroxysmal/persistent
Dry/Productive
Postural Variation
Diurnal Variation
Aggravating/relieving factor
Associated with chest pain, syncope, wheeze

Breathlessness

Duration
Onset
Progression
Grade
Postural and Diurnal Variation
Aggravating/relieving factor
PND/Orthopnea

Haemoptysis

Duration
Episodes
Fresh/Altered Blood
Associated with purulent sputum or food particle

Chest Pain

Duration
Site
Onset
Nature
Continuous/Intermittent
Radiation
Postural Variation
Aggravating/reliving factor
Associated with Nausea, Vomiting, Sweating
Associated with food intake

Sputum

Duration
Quantity
Odour
Color
Character
Postural and Diurnal variation
With or without blood

Wheeze

Duration
Diurnal variation
Aggravating/relieving factor

Negative History

TB

H/O fever with evening rise of temperature
H/O loss of weight
H/O loss of appetite
H/O night sweats

Malignancy

H/O dysphagia
H/O Hoarseness of voice

CVS

H/O pedal edema
H/O abdominal distention
H/O right hypocondrial pain
H/O puffiness of face
H/O palpitation
H/O syncope
H/O hoarseness of voice
H/O oliguria

Mode of onset

H/O loss of weight

Past History

H/O previous similar episodes

H/O DM, HT, BA

H/O TB(Any contact, Age, Treatment failure)

H/O suggestive of pneumonia

- Aspiration(Aspiration, Booze, Cough, Drowning, Epilepsy, Foreign Body- ABCDEF)
- Exanthematous fever
- Tooth extraction, Tonsillectomy, Allergy
- Trauma
- Exposure to STD's
- General anaesthesia

H/O suggestive of Pleural effusion

- Acute abdominal distress(Subphrenic abscess, Amoebic abscess, Pancreatitis)

H/O suggestive of past infections

- Measles, whooping cough
- Recurrent respiratory infection

Family History

Any other family members with similar complaints

H/O TB

Personal History

Smoking

Alcohol

Exposure (Occupational and STD)

Treatment History

Examination

General Examination

Consciousness

Comfortable

Afebrile

Built

Pallor

Jaundice

Clubbing

Cyanosis

Pedal Edema

Significant lymphadenopathy

Halitosis

Horner's syndrome(E-MAP: E-Enophthalmosis, M-Miosis, A-Anhydrosis, P-Ptosis)

Markers of TB

- *Phlyctern*
- *Scar/Sinus in the neck*
- *Tenia versicolor*
- *Lupus vulgaris*
- *Erythema nodosum*
- *Gynacomastia –INH*

Markers of HIV

- *Oral hairy leukoplakia*
- *Oral candidiasis*
- *Molluscum contagiosum*
- *Herpetic infection (Zoster)*
- *Generalized lymphadenopathy*

Vital Signs

- Pulse
- BP
- Temperature
- JVP

Examination of Respiratory System

Inspection

Upper respiratory tract

- *Nasal septum*
- *Polyp*
- *Oral hygiene*
- *Tonsils*
- *Post nasal drip*

Chest

- Symmetry
- Shape
- Moves equally with respiration or not
- Intercostal Fullness/Indrawing
- Crowding of ribs
- Sinus
- Scar
- Discharge
- Dilated veins

Tracheal position

Apical impulse

Drooping of shoulder

Supra/Infra clavicular hollowness

Palpation

Tracheal position

Apical impulse

Chest movement

Chest expansion measurements (Inspiration and Expiration)

Intercostal tenderness

Tactile fremitus

Lymph nodes (Supra clavicular, infra clavicular and axillary)

Percussion

Lung

<i>Region</i>	<i>Right</i>	<i>Left</i>
Directly on clavicle	+/-	+/-
Supra clavicular	+/-	+/-
Infra clavicular	+/-	+/-
Mammary	+/-	+/-
Axillary	+/-	+/-
Infra axillary	+/-	+/-
Supra scapular	+/-	+/-
Inter scapular	+/-	+/-
Infra scapular	+/-	+/-

Tidal percussion

Traube's space

Shifting dullness

Straight line dullness

Cardiac dullness

Auscultation

In the above mentioned areas

Breath sounds

Normal Vesicular

Bronchial

- Tubular
- Cavernous
- Amphoric

Added sounds

Crepitations

Ronchi

Pleural rub

Vocal resonance

Compared on both sides

Bronchophony

Egophony

Whispering pectoriloquy

Succession splash

Coin percussion

Other system

CVS : RHF, CCF

CNS : asterexis

Abdomen : liver abscess - tenderness

Diagnosis

_____sided _____(PE/Fibrosis/Consolidation) probably due to _____with/without signs of RHF.
