

ORTHOPAEDICS

(OSCE,INSTRUMENTS AND SPECIMENS)

OSCE

1

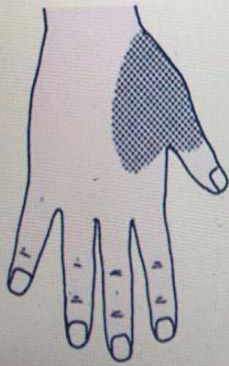

1. What is the diagnosis

2. Which nerve is involved

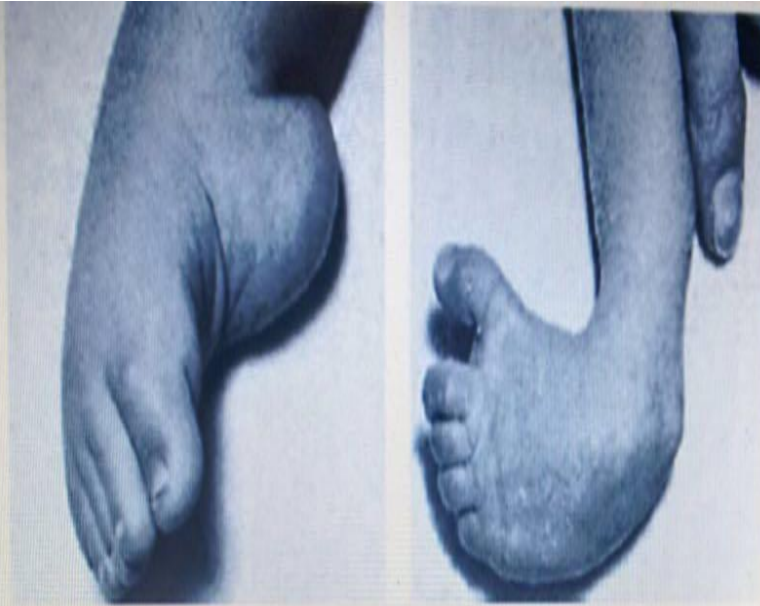

3. What movement is lost

4. Name the area of sensation lost

5. What is the splint used

2

1. What is the diagnosis
2. Name the deformities
 1. -
 2. -
 3. -
 4. -

3

1. What is the diagnosis
2. Name any 2 clinical feature
 1. -
 2. -
3. What is the xray finding
4. What is the treatment

Spot1

1. Wrist drop
2. Radial nerve
3. Wrist dorsiflexion
4. Anatomical snuff box
5. Cock up splint

Spot2

1. Congenital talipes equinus varus
2. Cavus
3. Equinus
4. Heel varus
5. Forefoot adduction

Spot3

1. Non union of shaft of humerus fracture
2. Symptoms
 - a. Painless
 - b. Abnormal mobility
3. Hypertrophic non union
4. ORIF with plating along with bone grafting

4

1. What is the diagnosis
2. Name the deformity seen
3. Which age group is commonly affected
4. What is the mechanism of injury
5. What is the treatment

5

1. What is the diagnosis
2. Which nerve is affected
3. Which movement is lost
4. Which fracture is commonly associated
5. What is the treatment

Spot 4

1. Colles fracture
2. Dinner fork deformity
3. Elderly > 50 years of age
4. Fall on outstretched hand
5.
 - a. Closed manual reduction followed by below elbow slab and then cast
 - b. ORIF with plating
 - c. External fixator

Spot 5

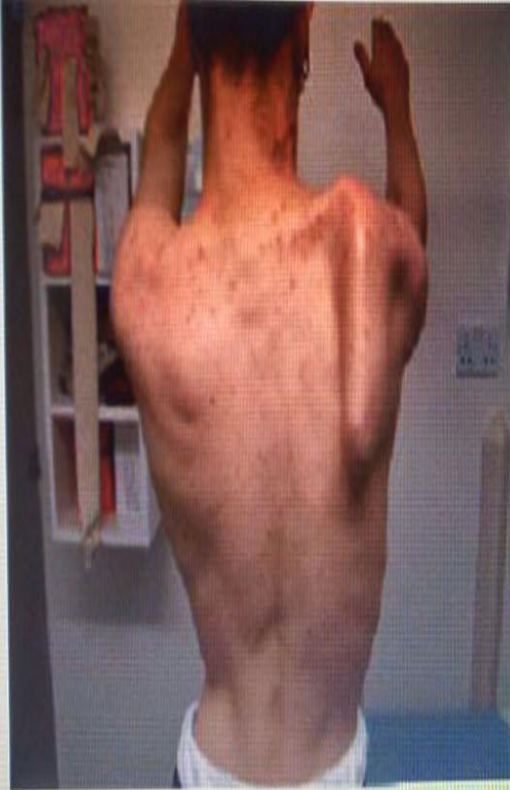

1. Foot drop
2. Common peroneal nerve
3. Ankle dorsiflexion
4. Fracture of neck of fibula
5. Physiotherapy and foot drop splint

6

1. What is the deformity seen
2. What is the cause for the deformity
3. What is the angle measured in this condition
4. What is the normal range of angle
5. What is the treatment of the above condition

7

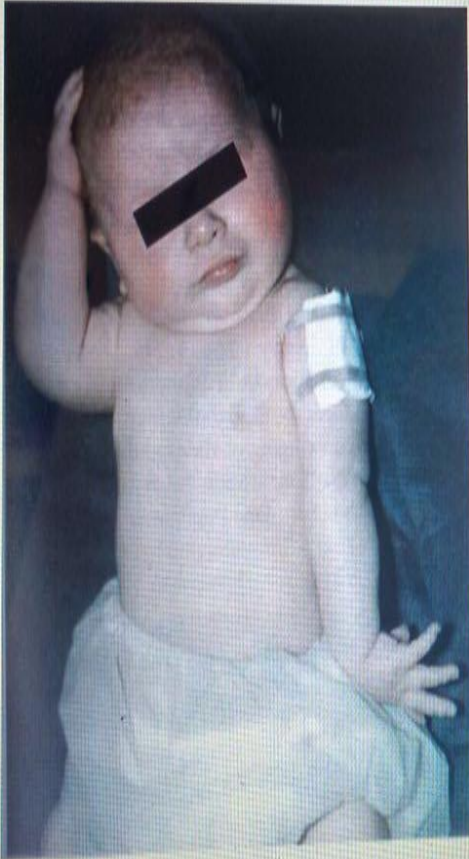

1. What is the diagnosis
2. Which nerve is affected
3. Which muscle is affected
4. What action is lost
5. What is the test used for this condition

8

1. What is the condition
2. What is the nerve affected
3. Which action is lost
4. Which muscle is overacting
5. Name an infectious condition associated with it

1. What is the diagnosis?
2. Which part of brachial plexus involved
3. What is the deformity
4. What movement is lost
5. What is the treatment

10

1. Identify the condition?
2. What is the clinical signs
3. What is the nerve commonly involved ?
4. What is the regimental badge sign
5. What is the treatment?

Spot 8

1. Ulnar claw hand
2. Ulnar nerve
3. Extension at interphalangeal joint and flexion at metacarpophalangeal joint
4. Extensor digitorum and extensor digiti minimi
5. Leprosy

Spot 9

1. Erbs palsy
2. Erbs point upper roots of brachial plexus C5 C7
3. Policeman tip hand
4. External rotation of arm and abduction
5. Physiotherapy

Spot 10

1. Anterior shoulder dislocation
2. Limitation and painful movement at shoulder joint
Unable to touch tip of opposite shoulder
3. Axillary nerve
4. Loss of sensation in the area of insertion of deltoid
5. Closed manual reduction and immobilisation in cuff and collar. Operative reduction

11

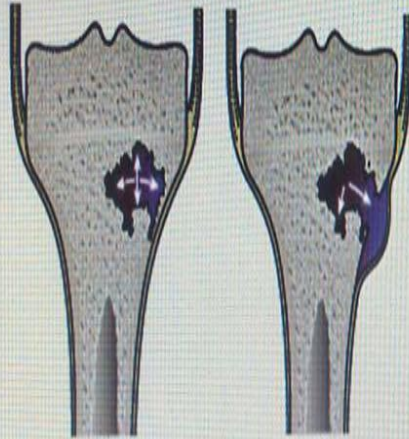

1. What is the lesion in Xray
2. What is the structure indicated by arrow
3. Which part of bone is commonly involved
4. Is this lesion painful or painless
5. What is the treatment

12

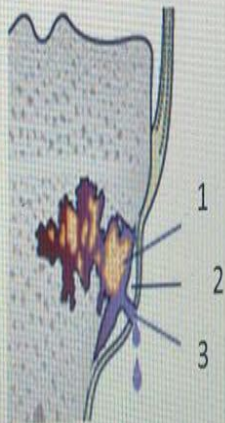

1. What is the lesion in Xray
2. What is the structure not seen in xray
3. Which part of bone is commonly involved
4. Is this lesion painful or painless
5. What is the treatment

13

(a)

(b)

1. What is the pathological process

2. What is the mode of infection

3. Name the structures in pictures

1.

2.

3.

Spot11

1. Osteoid Osteoma
2. Nidus
3. Diaphyseal region
4. Painful
5. Treatment
 - a. Removal of nidus
 - b. Radioablation

Spot12

1. Exostoses/Osteochondroma
2. Physes
3. Metaphyseal region
4. Painless
5. Extraperiosteal Excision

Spot13

1. Osteomyelitis
2. Haematogenous
3. Structures
 - a. Necrotic debris with cortical holes
 - b. Subperiosteal abscess
 - c. sinus tract

1. What is the tests performed ?
2. What ligament is tested
3. What are the other test for this condition
4. What will be the patient complaint
5. What is the treatment

1. What is the diagnosis
2. Which joint is most commonly involved
3. What are the symptoms in acute episode
4. What is the triggering factor
5. What is the crystal characteristic

Spot 14

1. Anterior Drawer test
2. Anterior Cruciate Ligament
3. Lachman test
4. Instability of knee
5. Reconstruction of ligament by allograft by arthroscopy or open surgery

Spot 15

1. Boutonniere deformity
2. Swan neck deformity
3. Rheumatoid arthritis
4. Female
5. NSAID's, Disease modifying anti rheumatoid drugs, corticosteroid, immunosuppressive agents

18

1. What is the test performed
2. What is the condition in hip
3. What maneuver is used
4. What is the other test for this condition
5. What is the treatment

21

1. Name the bursa indicated in the picture
2. What is Housemaids's knee
3. What is clergy man's knee
4. What is baker's cyst
5. What is the treatment for bursitis

24

1. Identify the anatomical structure

2. Name the muscles

1. -

2. -

3. -

4. -

acer

19

1. What is the diagnosis
2. What is the attitude of the limb
3. What is the nerve affected
4. What is the mechanism of injury
5. What is the treatment

25

1. What is the diagnosis
2. Which age group is commonly affected
3. What is the common complication
4. What is the deformity associated in this condition
5. What is treatment

1. Name the deformity
2. What is the metabolic disorder is in this condition
3. What is the deficient factor
4. Name any one associated deformity
5. What is the treatment

20

1. What is the diagnosis
2. What is limb attitude
3. What is the most common complication
4. Name any two treatment options
 1. -
 2. -

1. What is the deformity seen
2. Which is the most common condition causing it
3. What is the clinical test to determine this condition
4. What part of knee joint is damaged in this condition
5. What is the treatment for this condition

22

1. What is the condition
2. Name two tests for this condition
 1. -
 2. -
3. Associated clinical condition
4. What is the treatment

SPECIMENS AND INSTRUMENTS
